Skin Activator™ Daily Replenishing Cream

Herbalife has combined Cellular Nutrition with an advanced skin-care formula to create a product that can help your skin look and feel younger. The result: Skin Activator™ Daily Replenishing Cream.

Skin Activator™ Daily Replenishing Cream helps provide your skin with what it needs to regain a smoother, firmer, more youthful appearance. The light formula contains many ingredients including glucosamine, almond oil, green-tea antioxidant and sugar, which all work in harmony to increase levels of moisture and suppleness. With continued use, you'll see a reduction in fine lines and wrinkles, and more youthful-looking skin.

Now you can complement your Outer Nutrition Programme with Inner Nutrition. Cell Activator™, like Skin Activator™ Daily Replenishing Cream supplies the nutrients your cells use daily. These products may enhance your overall well-being, and good health will start from the inside out.
